Nursery and Kindergarten

Our promoters and partners:

About us

Infanterix are multi-lingual daycare providers in Munich. Since 2007, we have been enriching and developing the concept of early years' education through multi-lingual and multi-cultural kindergarten facilities. Infanterix cares for and educates children from the age of 6 months up until their school entry.

Pedagogical Concept

The foundation of our educational concept is based on the Bavarian Educational Plan (BEP) guidelines, a framework for Early Childhood Education and Care in day-care facilities. We provide the children with an equal opportunity to holistically develop their individual skills and competences.

In accordance with the BEP guidelines, the key areas include language and literacy, mathematical skills, environment, science and technology, movement and sports. Each key area is incorporated into the children's daily routine and introduced through specific themed projects based on the children's interests.

Multilingualism

An essential component of our pedagogical concept is language. Multilingualism is emphasized in our facilities (English-German groups and French-German groups). For Infanterix, bilingualism does not simply mean being able to speak two languages but rather it's seen as an opportunity to create a place which has a living dialogue with different cultures.

Educational Aims

The overall objective of the educational work at Infanterix is to educate the children entrusted to us. We want them to become confident, tolerant and responsible individuals, who are capable of dealing with any conflicts that may arise in our increasingly multi-cultural society.

Adaptation Phase

To ensure that your child has a good start at Infanterix, we place great importance on the adaptation phase. Since the children are still very young, they require a certain time to adapt to their new surroundings and daily schedule. Our friendly teachers are trained to guide your child through this process, step by step. Our aim is to involve the people that the child is already familiar with in order to allow a smooth transition.

Nutrition

Nutrition is a very important theme in every child-care facility, especially in the nursery groups. Eating habits are imprinted at a very young age. This is why we provide a nutritious and well-balanced menu using mainly organic and whole-grain ingredients.

Preschool

In the child's final year in Kindergarten we prepare them for school. We work with each child to support him or her in the skills they will need to make this transition a smooth one, such as language development or logical thinking. In our preschool lessons, we work closely with the children to ensure a solid educational foundation and to prepare them emotionally and socially for the next step on their educational path.

Our preschool program cooperates with primary schools and the Bavarian Ministry of Culture.

Our Team

Our concept is carried out by qualified staff members. At Infanterix, you can expect a professional and multi-cultural team of enthusiastic and motivated workers. The team works together to bring quality care and education to your children. There is a German speaker in every group, while the other teachers speak their own native language with the children (French or English).

Additional offers in our day-care facilities

In our day-care facilities, we offer various extra activities for a fee, such as swimming courses, skiing courses, music class and the "Buchkinder" project.
